METRIC
Canada is converting to the metric system.
Temperature, rainfall, snowfall, wind speed and
visibility are now expressed in metric units. All
distance markers and all road speed signs are in metric
units—kilometres and kilometres per hour. Service
stations have converted their gasoline pumps from
gallons to litres.

Miles X 1.6 = approximate kilometres (km)
Kilometres X 0.6 = approximate mileage

Look for a friendly welcome, personal attention and
a wealth of travel information at any of these
Travel Alberta Information Centres. Ask about
accommodations, weather and campground
conditions, free maps, guides and travel brochures.
For your convenience washrooms and picnic
areas are available at most centres.
Open from May Victoria Day weekend through
September.
